

## USB 2.0 4-Port Extender Kit 50M Power Over Cable

This USB 2.0 Extender Kit is a four port USB 2.0 extension solution with the ability to connect USB 2.0 and 1.1 devices. The Receiver Unit allows the connections of up to four (4) USB devices, providing access to webcams, hard drives, printers, scanners, cameras and so on.

The USB 2.0 4-Port Extender Kit provides true USB 2.0 extension at up to 480Mbps over Cat 5 cable or higher, a true plug-and-play solution without the need of additional software drivers.

The compact size and integrated wall mounting enable space-saving installation.
